1. OBJECTIVE

The objective of this task was to design and develop a modern, professional, and fully responsive personal portfolio website using only HTML5 and CSS3 — without using any CSS frameworks,
UI libraries, or downloaded templates.

The goal was to:

- Showcase my personal profile, technical skills, education, projects, and contact information
- Build a clean, attractive, and professional web interface
- Demonstrate strong fundamentals of semantic HTML5 and modern CSS3
- Implement fully responsive design for desktop, laptop, tablet, and mobile devices
- Apply professional color theory, typography, and layout principles
- Add smooth and professional hover animations and transitions

This task served as a practical application of front-end web development fundamentals and helped me strengthen my skills in writing clean, well-organized, and maintainable code.

2. TECHNOLOGIES USED

The website was built entirely from scratch using the following technologies:

Technology	Purpose
HTML5	Semantic structure and content
CSS3	Styling, layout, animations
Google Fonts	Poppins typography
CSS Flexbox	Navigation and component layouts
CSS Grid	Section and card layouts
CSS Media Queries	Responsive design (4 breakpoints)
CSS Transitions	Hover and smooth animations
CSS Variables	Consistent color and spacing theme

NO frameworks used:

✗ No Bootstrap

✗ No Tailwind CSS

✗ No JavaScript

✗ No downloaded templates

3. WEBSITE STRUCTURE

The website is organized into 7 major sections accessible through the navigation bar:

1. HOME / HERO
   - Name, professional tagline, short intro
   - Profile image
   - Call-to-action buttons
   - Social links

2. ABOUT
   - Personal introduction
   - Academic background
   - Career interests
   - Personal info list

3. SKILLS
   - 12 skill cards with progress indicators
   - HTML5, CSS3, JavaScript, Bootstrap, jQuery, PHP, Laravel, MySQL, WordPress, Git/GitHub, REST API, React

4. EDUCATION & EXPERIENCE
   - Academic timeline (degree, university, CGPA)

- Professional experience
- Teaching role and freelance projects

5. PROJECTS
- 3 featured Laravel projects
- Portfolio Website
- SHWARIZO Restaurant Website
- ToDo List Application

6. CONTACT
- Email, phone, location, social links
- Working contact form UI

7. FOOTER
- Copyright, brand info
- Quick links, services
- Contact details

FILE STRUCTURE:

```
portfolio/
├── index.html
├── style.css
├── README.md
└── images/
    ├── profile.jpg
    ├── about.jpg
    ├── project-portfolio.jpg
```

```
    ├── project-restaurant.jpg
    └── project-todo.jpg
```

4. DESIGN APPROACH

COLOR THEME:

- Primary Background: Dark Charcoal (#0f0f13)
- Secondary Background: #16161b
- Card Background: #1a1a21
- Primary Accent: Warm Orange (#ff6b35)
- Text: Light Gray (#e8e8ea)
- Muted Text: #9a9aa3

The dark theme with warm orange accent was chosen to make the portfolio visually stand out from the typical blue/ purple portfolios while maintaining excellent contrast and readability.

TYPOGRAPHY:

- Font Family: Poppins (Google Fonts)
- Weights Used: 300, 400, 500, 600, 700
- Line Height: 1.7 for readability
- Font sizes scale from 0.75rem to 3.6rem

LAYOUT SYSTEM:

- CSS Grid for section layouts (about, skills, projects, contact)
- Flexbox for component alignment (navbar, buttons, cards)

- Container max-width: 1150px
- Consistent 100px vertical padding between sections

SPACING & HIERARCHY:

- CSS variables used for consistent spacing
- Border radius: 12px (cards), 8px (buttons/inputs)
- Section titles with orange underline accent
- Clear visual hierarchy from heading to body text

ANIMATIONS:

- Smooth 0.3s transitions on all interactive elements
- Subtle hover lift effects on cards and buttons
- Progress bar animations for skills
- No excessive or distracting motion

5. WEBSITE FEATURES

RESPONSIVE DESIGN:

- Tested on Desktop (1920×1080), Laptop (1366×768), Tablet (768×1024), and Mobile (390×844)
- 4 responsive breakpoints: 1024px, 768px, 480px
- No horizontal scrolling on any device
- Fluid grids and flexible images

NAVIGATION BAR:

- Fixed/sticky navigation at top

- Smooth scrolling between sections
- Active hover underline animation
- CSS-only mobile hamburger menu

HERO SECTION:
- Professional introduction with name and tagline
- Circular profile image with orange glow accent
- Two call-to-action buttons
- Social media links

SKILLS CARDS:
- 12 skill cards in responsive grid
- Animated progress bars
- Hover effects with top line slide-in
- Learning tag for React (currently learning)

EDUCATION TIMELINE:
- Vertical timeline with orange accent line
- Animated dot markers on hover
- Date badges in orange pills
- Card slide animation on hover

PROJECT CARDS:
- 3 project cards with professional layout
- Image zoom on hover with orange gradient overlay

- Tech stack tags
- GitHub and Live Demo buttons

CONTACT SECTION:

- Contact information in card layout
- Working contact form UI (front-end only)
- Form fields: Name, Email, Subject, Message, Submit
- Orange focus rings on inputs

FOOTER:

- 4-column layout (brand, quick links, services, contact)
- Arrow slide-in animation on link hover
- Copyright and credits

SMOOTH ANIMATIONS:

- Buttons: lift + orange glow on hover
- Nav links: orange underline slide-in
- Skill cards: orange top line + lift
- Project cards: image zoom + title color change
- Timeline items: slide right + dot glow
- Footer links: arrow slide-in
- Social icons: color transition

ACCESSIBILITY:

- Semantic HTML5 elements
- Alt text on all images

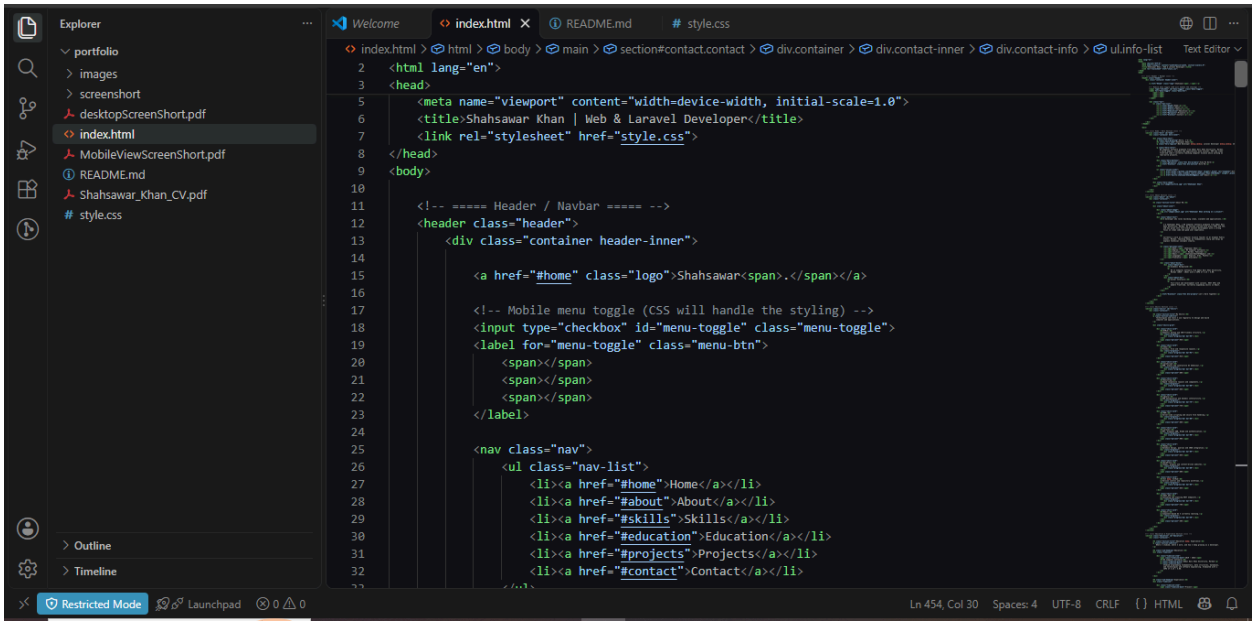

- Focus-visible outlines for keyboard navigation
- Good color contrast ratio
- Smooth scroll behavior

EXTRA POLISH:

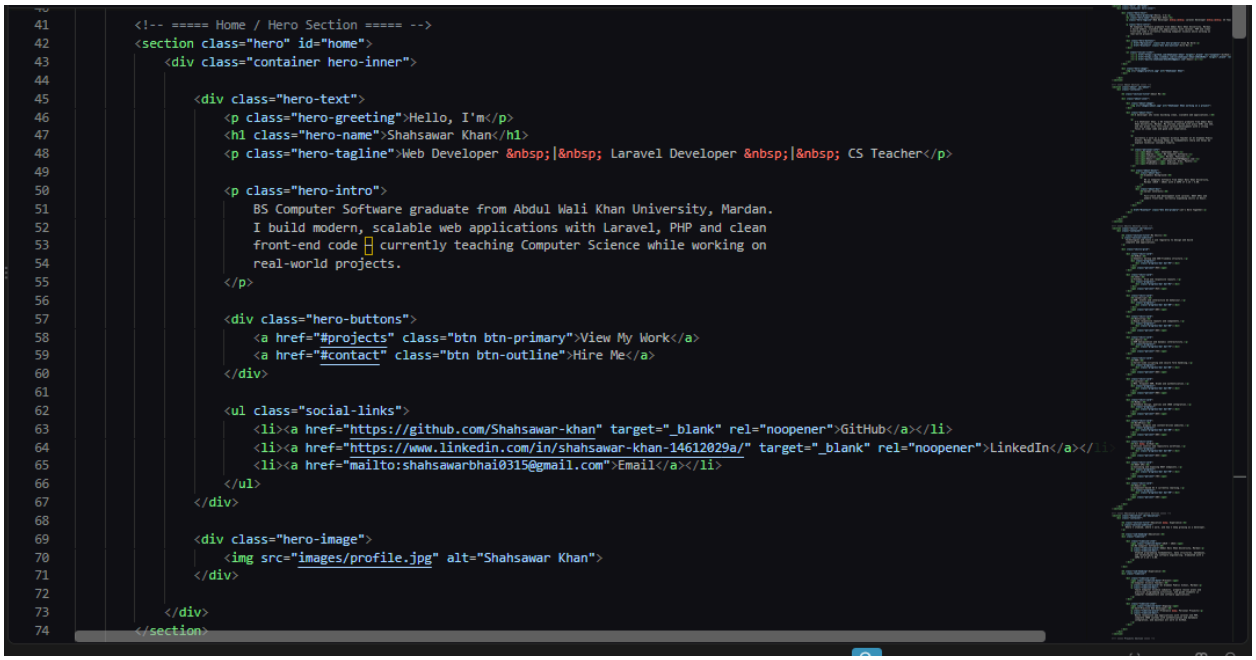

- Custom scrollbar styling
- Orange text selection color
- Backdrop blur on navigation bar

10. CONCLUSION

This task successfully demonstrated my ability to design and develop a complete, professional portfolio website using only HTML5 and CSS3. Through this project, I strengthened my understanding of:

- Semantic HTML5 structure and best practices
- Modern CSS3 techniques including Flexbox, Grid, and CSS Variables
- Responsive web design principles and mobile-first thinking
- CSS transitions and hover animations
- Professional color theory and typography
- Clean code organization and BEM-style naming conventions
- Version control with Git and GitHub

The final website is fully responsive, well-structured, visually appealing, and meets all the requirements outlined in Task 01. It effectively showcases my skills, projects, and professional profile while demonstrating my front-end development capabilities.
This project also reinforced the importance of clean, maintainable code and user-focused design — skills that will be valuable in my career as a full-stack developer.
